Nutrition Informatics for Registered Dietitians

Have you ever wanted to discover how nutrition informatics fits into the larger framework of healthcare informatics? OR, learn about the potential for dietetics practitioners to become more involved in EHR implementation?

If you said yes to any of these questions, check out **Nutrition Informatics for Registered Dietitians**

**Course Description**
The concepts covered in these 3 web-based modules include:

- Defining information management, information technology, health informatics, and nutrition informatics
- Explaining the difference between information literacy and computer literacy
- Explaining the difference between electronic medical records (EMR) and electronic health records (EHR)
- Describing potential uses of personal health records (PHR) and how PHRs can improve nutrition care
- Identifying what tools are available to assist providers in decision-making regarding nutrition

Program Details

4.5 Continuing Professional Education Credits (Level 2)

Sample CDR Learning Need Codes:

- (1065) Informatics
- (1020) Computer, electronic technology
